

You're invited!

The N.C. Transportation Museum Roundhouse and Turntable ASME Dedication March 19, 2011

On March 19 the NC Transportation Museum's Turntable and Roundhouse will become North Carolina's 4th ASME Historic Landmark! This program is part of the museum's Spring Kick Off festivities. It has been over 25 years since there has been an ASME Historic Landmark designated in North Carolina. ASME members are invited to celebrate with us as the Turntable and Roundhouse join the ranks with the Reed Gold Mine, Hiwassee Dam, and Idols Station.

The dedication ceremony begins at 2 p.m. at the turntable in front of the Bob Julian Roundhouse.

Arrive early for a full day of activities during the museum's Spring Kick Off, including the Flagg 75 steam engine pulling the Caboose Train, diesel train rides, live music, and for the kids - a magician and balloon animals.

Spring Kick Off: While the dedication is free to attend, ASME members can also participate in our Spring Kick Off activities at reduced rates. Events are free to ASME members. Family rates: \$5 for adults, \$4 for children for unlimited train rides and activities.
